

Blue4Care

The warranty extension by BlueSens

The gas sensors by BlueSens are extremely high-quality measuring instruments. To ensure the highest accuracy over a lot of years, we recommend our annual maintenance service Blue4Care. Through this service, your sensors will be reconditioned as good as new and you will also receive an extended warranty of one year to a maximum of 6 years. Calculable maintenance costs you have the security of being able to work with a full warranty for a long time with a sensor in mint condition.

Blue4Care is a complete service package for your sensors. The sensor is checked, if necessary, wear parts are replaced and then the meter is calibrated at the factory new. With Blue4Care you can expect predictable maintenance costs. Apart from errors due to incorrect treatment of the sensor you can keep the full factory warranty for years.

You do not have to order the immediate or pay when buying Blue4Care. Within the first year of purchase we will contact you and offer you the service.

If you wish to use the service, we will make a service appointment. The service usually takes one working week (excl. the time for shipping).

The advantages of Blue4Care at a glance:

- Security: you can be sure to measure over a long period of time with a mint sensor inclusive warranty
- Convenient: BlueSens reminds you of the maintenance schedule
No contract: every year you get a deal
- Cheaper compared to a "maintenance on demand"
- Predictable: low annual maintenance costs for full warranty
- Extended warranty: Every Blue4Care service extends the warranty for one year (up to 6 years)

With the extended warranty Blue 4Care save up to 50% compared to the "maintenance on demand". Please contact us for details.
